RAHUL JAISWAL

Delhi, India • Mail: rahul.miles5319@gmail.com **• LinkedIn:** www.linkedin.com/in/rahul-jaiswal001

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building CI/CD pipelines, Linux-based systems, containerized applications, and monitoring solutions. Worked on real-world DevOps projects using Jenkins, Docker, Kubernetes, and Prometheus–Grafana. Actively seeking DevOps internship or trainee opportunities.

EDUCATION

- **Bachelor of Technology (B.Tech) in Computer Science Engineering |** SETH VISHAMBHAR NATH INSTITUTE OF ENGINEERING & TECHNOLOGY, Lucknow, Uttar Pradesh *Currently in 3rd Year (Graduating: 2027)*
- **Diploma in Information Technology Enabled Service & Management |** Integrated Institute of Technology, Dwarka *August 2020 – July 2023*

TECHNICAL SKILLS

DevOps & CI/CD: Jenkins, Git, GitHub, Docker, Docker Compose
Containers & Orchestration: Docker, Kubernetes (K3s)
Monitoring & Observability: Prometheus, Grafana, Alertmanager
Linux & Systems: RHEL, Ubuntu, Bash, Networking, Troubleshooting
Programming: Python, Java, C++, JavaScript (Basics)
Databases & Analytics: MySQL, SQL Server, Power BI

PROJECTS

CI/CD Deployment Pipeline using Jenkins, Docker & Kubernetes (K3s)

GitHub: https://github.com/RahulJaiswal-01/notes-app

- Built an end-to-end CI/CD pipeline for a Flask-based notes application using Jenkins, Git, Docker, and Kubernetes (K3s).
- Automated application build, Docker image creation, and deployment to a Kubernetes cluster with rollback support.
- Exposed the application using Kubernetes NodePort, demonstrating a complete DevOps workflow from code to deployment.

Monitoring & Alerting System – Prometheus & Grafana

GitHub: https://github.com/RahulJaiswal-01/monitoring-dashboard-prometheus-grafana.git

- Implemented system and application monitoring using Prometheus and Node Exporter deployed via Docker Compose.
- Designed Grafana dashboards to visualize CPU, memory, disk, and network performance metrics.
- Configured Alertmanager with Slack webhook integration to send real-time alerts for system issues.

Credit Card Analytics Dashboard – Power BI + SQL (Analytics)

GitHub: https://github.com/RahulJaiswal-01/credit_card_dashboard.git

- Built interactive Power BI dashboard using SQL Server + Excel datasets.
- Analyzed 667K+ transactions with insights on revenue, customer segments & spending behaviours.
- Designed KPIs for revenue, interest earned, card performance & demographics.

WORK EXPERIENCE

Trainee Technical Support Engineer (Deputed at Sony India Pvt. Ltd.) Superwell Services Pvt. Ltd. Sep 2023 – Nov 2023.

- Analyzed logs, resolved user issues, and supported system performance improvements.

Intern – Website Troubleshooting | SP Automation, Faridabad. Feb 2023 – May 2023

- Diagnosed website issues, optimized performance, and implemented feature updates.

CERTIFICATIONS

- **Red Hat Certified System Administrator (RHCSA)** – Valid till Apr 2027
- Cybersecurity Fundamentals
